SUMMARY

Skilled Senior UI Engineer with 3 years of experience in the role and a total of 5 years in software industry. Specialized in building dynamic and responsive UIs using React, Node.js, and Express.js and with a proven ability to deliver high-quality solutions in fast-paced environments.

EXPERIENCE

Senior UI Engineer

Aureus Analytics Pvt Ltd   November 2021 - Present, Mumbai, India

Product-based company in the insurance domain, offering **DONNA**, a cloud-based data analytics service that uses AI, ML, and NLP to provide independent brokers with real-time customer sentiment insights.

- Integrated and customized **AgGrid** to improve data visualization, reducing data loading time by **50%** and enhancing UI performance for displaying **1,000+ data entries** efficiently.
- Developed multiple **Node.js APIs** to fetch and update data in the backend, handling **over 1,000 requests per day** while ensuring fast and reliable data transactions.
- Worked on **10+ microservices** and redesigned multiple **UI components** to create config-driven UI, improving flexibility and reducing the time required for future updates by **30%**.
- Created multiple **shell scripts** to automate CI/CD tasks, reducing manual deployment time by **50%** and improving deployment consistency across environments.
- Developed an onboarding microservice using React and Node.js, which streamlined the process, enhanced user experience and reduced onboarding time significantly from 2-3 days to just a day, improving overall efficiency.

Java Engineer

Aureus Analytics Pvt Ltd   March 2020 - November 2021, Mumbai, India

- Created multiple backend microservices to process over 300K records everyday coming in from different data sources.
- Created multiple APIs to enable the UI to access internal backend services, handling **500+ requests per day**.
- Created multiple **shell scripts** to automate data refresh activities for all clients, reducing manual work by **60%** and improving data refresh speed for **50+ clients**.

PROJECT

DevTinder

Personal Project • thedevtinder.com/ • January 2025 - February 2025

- **Responsive User Interfaces**: Designed and developed 5+ responsive screens, ensuring seamless viewing across devices with different screen sizes.
- **Connection Requests**: Implemented functionality that allows users to send and accept connection requests.
- **Real-Time Chat**: Developed a real-time chat feature, enabling instant messaging between connected users, with **50+ test messages exchanged** during development.

Swiggy Clone

Personal Project • swiggy-pritish.netlify.app/ • September 2023 - October 2023

- **Location-Specific Restaurant Listings**: Designed and developed a UI to display a list of restaurants based on user location, enabling the app to display over 2**0+ restaurants** and **200+ menu items** tailored to each user's locality.
- **Shimmer UI for Improved User Experience**: Integrated a **Shimmer UI effect** across the app, enhancing the user experience by providing a smooth loading animation, which reduced perceived wait times by **20%** and improved overall app retention.
- **Cart Management System**: Created a screen for users to manage cart, allowing users to add, remove, and update the quantity of items.
- **Search Functionality**: Added a search feature that allows users to easily search for restaurants or menu items. The search functionality improved the time-to-order**,** helping users find desired options in under **10 seconds**.

EDUCATION

Master of Computer Application

University of Mumbai • Mumbai • 2019

Bachelor of Science in Information Technology

University of Mumbai • Mumbai • 2016

SKILLS

Frontend: HTML, CSS, Javascript, React.js, Redux Toolkit, Tailwind CSS, Material UI, Ag Grid
Backend: Node.js, Express.js
